

## 基本信息

|       |                                      |
|-------|--------------------------------------|
| 别名:   | NM_001290051.1;hNP95; hUHRF1; huNp95 |
| 平台编号: |                                      |
| 启动子:  | CMV                                  |
| 复制子:  | pUC                                  |
| 原核抗性: | Amp                                  |
| 真核抗性: | G418                                 |
| 克隆菌株: | DH5a                                 |
| 培养条件: | 37 度                                 |
| 质粒属性  |                                      |
| 质粒宿主: | 哺乳细胞                                 |
| 质粒用途: | 蛋白表达                                 |
| 片段类型: | ORF                                  |
| 片段物种: | 人                                    |
| 原核抗性: | Amp                                  |
| 真核抗性: | G418                                 |
| 荧光标记: |                                      |

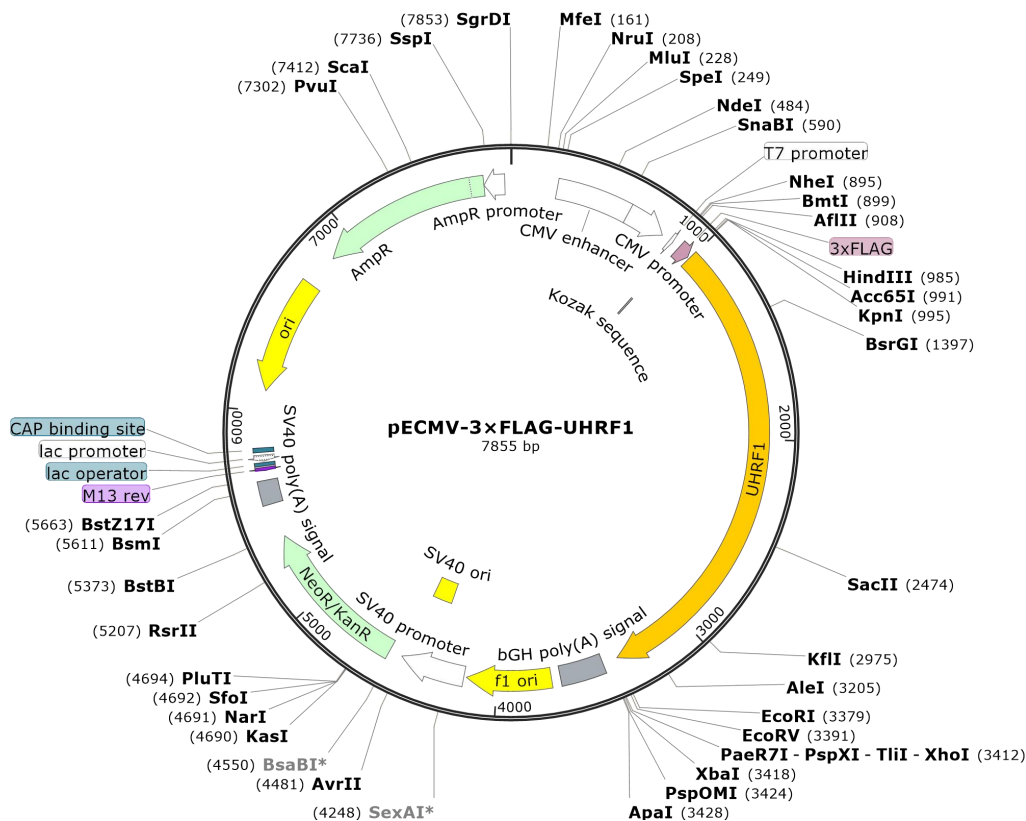

## 功能简介

人源基因哺乳细胞过表达质粒

## 质粒简介

pECMV-3×FLAG-UHRF1 人源基因质粒

## 质粒图谱

## 质粒序列
